DE28

Differential pressure transmitter

09005611 • DB_EN_DE28 • Rev. ST4-A • 09/16

1 Product and functional description

1.1 Performance features

Typical applications

- Differential pressure measurements between the supply and return on heating systems
- Monitoring of filters, fans and compressors
- Ship applications (only DNV GL model)

Important features

- Over-pressure-proof
- Maintenance-free thanks to wear-free "inductive pickup"
- Very versatile
- Sturdy model
- Optionally IP54 or IP65 casing[1]
- DNV GL type-tested model in the IP54 casing

1.2 Intended use

The DE28 is a measuring transducer for measuring non-aggressive gas-like and fluid media that is neutral to over-pressure, under-pressure and differential pressure. Always check the media compatibility with the manufacturer if used with potentialy aggressive media.

In the standard model, the device is suitable for many measuring tasks in all industrial or sanitary sectors.

The DNV GL type-tested models are suitable for use on ships in machine rooms, control rooms and pump rooms. Please see the following table for details about the application place.

1.4 Design and mode of operation

All devices of this type series have a sturdy and non-sensitive membrane measuring unit with an inductive path sensor. All devices work based on the same measuring principle and are suitable for measuring over-pressure, under-pressure and differential pressure.

In the idle position, the spring forces are equalised on both sides of the measuring diaphragm. When pressure is exerted, force is exerted on one side of the membrane and this moves the membrane system against the measuring range springs until the spring forces are compensated.

The movement of the measuring diaphragm is transferred via a tappet into the core of the inductive displacement sensor. The downstream measuring electronics convert the signal of the path sensor into a pressure-proportional unit signal (0…20 mA, 4…20 mA or 0…10 V).

2.7 Construction design

2.7.1 Process connection

All device models are available with the following process connections:

Inner thread	G⅛
Cutting ring connection (brass galvanised)	for 3 mm tube
	for 6 mm tube
	for 8 mm tube
Hose screw connection (aluminium anodised)	for 6/4 mm hose
	for 8/6 mm hose

2.7.2 Electrical connection

Devices with IP54 (standard model)

Cable screw connection	M16 x 1.5 mm
Cable diameter	4.5…10 mm
Connection terminal	Screw terminal with wire protection
Connection cross-section	0.5 … 1.5 mm^2 fire-wire with/without ferrules
Option	
Number cable YSLY-JZ 4 x 0.75 mm^2 (permanently wired)	1 m
	2.5 m
	5 m
Option	
M12 socket	5-pin male, M12 x 1
M12 connection cable	see accessories

Devices with IP54 (DNV GL model)

Cable screw connection	M16 x 1.5 mm
Number cable SABIX BL 400 FRNC 4 x 0.75 mm^2 (permqnently wired)	1 m
	2.5 m
	5 m

Devices with IP65

Cable screw connection	M16 x 1.5 mm
Connection terminal	Screw terminal with wire protection
Connection cross-section	0.5 … 1.5 mm^2 fire-wire with/without ferrules
Option	
Number cable YSLY-JZ 4 x 0.75 mm^2 (permanently wired)	1 m
	2.5 m
