

yeten combustion

industrial burners & control equipments

NHG INDUSTRIAL GAS BURNERS

FEATURES

Capacities: 400 kW .. 20 MW

Working Temperature: Max. 1600 °C

Combustion Air Temperature: Max. 600 °C

Fuels: NG, LPG, Propane, COG, etc.

Ignition: Pilot Burner, Direct Spark Plug

Converging & Diverging Refractory Tiles

APPLICATIONS

Reheat Furnaces & Ladle Heating Systems

Aluminium Melting & Holding Furnaces

Copper Melting Furnaces

Frit & Glass Melting Furnaces

Rotary Furnaces, Hot Air Generators

Incinerators

APPLICATION AREAS

Reheat Furnaces

Ladle Heating Systems

Aluminium Melting Furnaces

Aluminium Holding Furnaces

Copper Melting Furnaces

Frit Melting Furnaces

Rotary Furnaces

Incinerators
